

The Palms Neighborhood Council requests City Council open a Council File such that:

1. The City implement the Five Principles of Responsible Outdoor Lighting that minimize light pollution by following these guidelines (adopted by the Illuminating Engineering Society and the International Dark-Sky Association):

- All lights should have a clear purpose.
- Light should be directed only where needed.
- Light should be no brighter than necessary.
- Light should be used only when it is useful
- Use warmer color lights where possible.

2. The City require all new development and improvements conform to the U.S. Green Building Council LEED 4.1 Sustainable Site Credit for Light Pollution Reduction.

3. The City enact/codify these principles through its departments and agencies for City facilities and properties such as buildings, parking lots and parks, the streetlight system, the airport and port, and for private development.

4. Community Plans and Specific Plans also enact similar dark sky practices and include limitations on bright lights, light trespass, and illumination of building facades.
